

## LZM's warning to member countries of WTO/WHO

Per trading minister of WTO/WHO member

Dear

Sirs/Madam

### To expose conceal for medical science invent and how to murder the inventor

Using air as an interface definition, the bird flu, like SARS and other types of flu infections, is a superficial bacterial infection of the lungs. Such bacterial infections can only be dealt with superficially. This can be said to be the law of the conversation of energy. And according to the law of the conversation of energy, any medicine which is to be ingested into the stomach or injected cannot be considered as a specific medicine, in the context of superficial bacterial infections.

To explain further, the *Tarniflu* relies on absorption through the intestines and stomach in order to enter the blood stream to produce antibodies and to neutralize the viruses produced by the bacteria infection. Obviously, neutralization of the virus and killing of the bacteria are two totally different matters.

While the vaccine can certainly bring about the production of antibodies in the blood, and neutralization of viruses is indeed the specialty of *Tamiflu*, the effect of *Tamiflu* really depends on the type of the bacteria which produced the virus in the first place! Yet the China and HongKong governments have been conducting intensive propaganda campaigns emphasizing the neutralization of viruses by *Tamiflu* and the specialty of *Tamiflu*, with no explanation as to how to kill the bacteria. This clearly demonstrates an ignorance of medical science and an effort to deliberately conceal the truth!

Therefore, the *Tamiflu* will not be able to kill the bird flu and SARS bacteria. The China and Hongkong governments are jointly deceiving the people! In actual fact, the China and Hongkong governments have been using LZM's invention secretly to cure SARS and bird flu patients since 15 May 2003. However, their inability to publicly use the invention has resulted in the deaths of many from SARS and bird flu. This has also resulted in many phthisis patients not being able to benefit from the invention of the PFCO medicine! Such is the sorrowful state of the Hongkong society!

The China and Hongkong governments should respond to LZM's criticism! LZM's patent application of PCT/SG03/00145 has now been submitted to the relevant patent authorities of 80% of WTO/WHO countries, any government's policy of medical treatment and to renew the textbook which can't do without this invent, therefore, please do not assist in concealing the truth, in insulting civilization, falsifying medical science, and deceiving the people of your country, thereby leaving a bad name in history.

Please be concerned with the civil rights of Hong Kong and to look through the website <http://www.ycec.com/Lt-to-world-051017.htm> and remind your government to stop concealing the invention of curing SARS and bird flu!

I hope that per member country of **WTO/WHO** can have the full control over the bird flu in your country.
